

From Class to Clinic: Hands-On Shared Decision Making

Do you ever fear that patients are making treatment decisions without fully understanding their options?

Do you wish you could meaningfully engage your patients?

Do you want to feel more satisfied with the care you're providing?

Learn how you can use *Shared Decision Making (SDM)*, a collaborative process that allows patients and their providers to make health care decisions together, taking into account the best scientific evidence available, as well as the patient's values and preferences.

This training opportunity will provide you with hands-on experience so that you can walk away being able to apply SDM, measure its impact and serve as a champion at your organization.

Target audience: providers, nurses, administrators, team-based care managers, and others interested in Shared Decision Making. SDM can be applied to many clinical situations and is a required element for lung cancer screening reimbursement.

Elliot Hospital is accredited by the New Hampshire Medical Society to sponsor continuing Medical Education for physicians. Elliot Hospital designates the educational activity for a maximum of 6.00 AMA PRA Category 1 Credit™.

Join us for this exciting opportunity:

Wednesday, June 22, 2016
